

AeroSleep®

What is OEKO-TEX?

OEKO-TEX is a worldwide independent certification system for consumer textile products.

What is OEKO-TEX 100?

The OEKO-TEX 100 certificate has been developed to ensure consumers that certified products are not harmful. Only consumer textile products of which all of the raw materials are being profoundly analyzed and approved are being rewarded with this certificate.

The OEKO-TEX tests for harmful substances are fundamentally based on the respective purpose of the textiles and materials. The more intensive the skin contact of a product and the more sensitive the skin, the stricter the human-ecological requirements that need to be complied with.

All of our mattresses are **OEKO-TEX 100, class I** certified, which means that they meet the strictest norms applicable to textiles intended for use by babies and toddlers aged 0-3.
